

**Dear Hiring Team,**

I am writing to express my interest in the Full Stack Developer (React.js & Node.js) position. As a MERN stack developer with a strong command of both front-end and back-end technologies, I bring hands-on experience building full-scale applications with modern, scalable architecture and a terminal-first development workflow.

Over the past few years, I have completed multiple real-world projects using React.js, Node.js, Express, MongoDB, and modern JavaScript tooling. My work emphasizes performance, maintainability, and clean design systems. Selected examples from my portfolio include:

- DeshGuide – Tourism Management System: <https://deshguide.surge.sh>
- WorkElevate – Job Portal: <https://werkelevate.surge.sh>
- EduVerse – Group Assignment Tool: <https://edu-verse.surge.sh>
- FlavorBook – Recipe Marketplace: <https://flavor-book.surge.sh>
- Developer Portfolio: <https://shahjalal-labs.surge.sh>

I work in a Linux-based environment using Hyprland, Neovim, Tmux, and Zsh to maintain high productivity and code quality. I am comfortable building reusable React components, managing state with modern tools, and designing performant RESTful APIs. While most of my experience is with MongoDB, I am also familiar with PostgreSQL and CI/CD concepts.

I am excited by your mission in health-tech and the opportunity to contribute to a meaningful project in collaboration with stakeholders and product leadership. I'm confident I can take ownership of core product modules and deliver reliable, production-ready solutions that scale.

Thank you for your consideration. I welcome the opportunity to discuss how my background can align with Remote Office's goals.

Sincerely,

Md. Shahjalal
