Gazipur, Dhaka, Bangladesh.

Career Objective --

Innovative developer passionate about building fast, scalable, and user-focused applications. I deliver clean, maintainable solutions that solve real-world problems and drive impact.

Skills --

Frontend: React, NextJs, React Router, Tailwind CSS, Axios, TanStack Query, Framer Motion
Backend: Node.js, Express.js, Firebase
Database: MongoDB
Authentication & Hosting: Firebase, JWT, Surge, Netlify
Tools & Environment: Nvim, Tmux, Zsh, Git, Linux (Hyprland), Vite, VsCode, Postman.

Soft Skills: Strong communicator · Creative and innovative thinker · Proven problem solver · Expert in customized, automated workflows · Highly efficient with terminal-driven development

Professional Training ([Certificate](#)) --

[**Full Stack MERN Development**](#): Trained in building modern, scalable web applications using MongoDB, Express.js, React, and Node.js. Focused on real-world project architecture, REST APIs, authentication, and deployment.

Projects ---

DeshGuide   [Live](#) | [Github](#) | [Server](#) | [Video Demo](#)

A full-stack tourism platform enabling real-time booking, storytelling, and role-driven dashboards.
Key Features:
- Implemented secure, multi-role authentication (Tourist, Guide, Admin) with JWT-protected routing.
- Engineered seamless package booking, interactive story sharing, and tour guide applications.
- Integrated Stripe for robust, real-world payment handling and checkout flows.
Technology used: React, Node.js, Express.js, MongoDB, Firebase Auth, Stripe, Tailwind CSS, JWT, React Router, TanStack Query, Framer Motion.

FlavorBook   [Live](#) | [Github](#) | [Server](#) --

A full-featured platform for recipe sharing, chef booking, blogging, and ingredient marketplace.
Key Features:
- Explore chef profiles and book them via checkout flow
- Share and browse recipes with tags and categories
- Read food-related blogs with comments and likes
- Buy and sell recipe ingredients in a modern marketplace
Technology used: React, Node.js, Express.js, MongoDB, Firebase, Tailwind CSS, JWT, TanStack Query, React Router, Framer Motion

EduVerse   [Live](#) | [Github](#) | [Server](#) --

An online assignment and group study portal with collaborative features.
Key Features:
- Assignment creation and submission via Google Docs
- Peer-based evaluation with feedback and marking
- View submitted and evaluated assignments in dashboard
- JWT-based secure authentication and protected routing
Technology used: React, Node.js, Express.js, MongoDB, Firebase, Tailwind CSS, JWT, React Router, TanStack Query, Framer Motion

Education ---

Pursuing B.Sc. in Mathematics (1st Year, Ongoing)
Focus: Analytical thinking, problem-solving, and logical reasoning

Languages --

- Bengali — Native, English — Fluent

Technical Interests & Personal Projects --

- Created a CLI-first Linux dev workflow with Hyprland, Neovim, Tmux, SurfingKeys etc. ([Dotfiles](#))
- Engineered a dotfile-driven environment with custom keybindings and terminal automation to boost coding efficiency.
