Bonosree, Dhaka, Bangladesh

Professional Summary

Full Stack Developer with production experience building web and mobile applications using Node.js, TypeScript, React, Next.js, Redux, PostgreSQL, and MongoDB. Experienced in REST APIs, microservices, Socket.IO, Redis, RabbitMQ, AWS, Docker, payment gateway integrations, and third-party APIs. Comfortable using agentic AI and AI-assisted development tools to improve development workflows and build practical application features.

Professional Experience

Backend Developer

SM Technology — 2025 – Present

Production Backend Ownership & Impact

- - Develop and maintain production-grade backend services with Node.js, TypeScript, Express, Prisma, PostgreSQL, and MongoDB.
- - Build and maintain scalable REST APIs and real-time systems with Socket.IO.
- - Integrate payment gateways, third-party APIs, and external services.
- - Implement secure authentication, authorization, and core business workflows.
- - Build scalable systems using Redis, RabbitMQ, Docker, AWS, and Linux.
- - Leverage AI and agentic tools to accelerate development and automation.

Projects

Commerzo — Multi-Vendor E-commerce Platform

[Github](#) | [Api Docs](#)

- Built backend using Node.js, TypeScript, Express, Prisma, and PostgreSQL.
- Implemented JWT authentication, RBAC, product, order, and payment workflows.
- Integrated Stripe, webhooks, Redis, RabbitMQ/BullMQ, and file storage.
- Designed modular REST APIs with validation and error handling.

Guidely — Mentorship & Networking Platform

[Github](#) | [Api Docs](#)

- Built backend services for mentorship, networking, scheduling, and matching.
- Implemented real-time chat and notifications using Socket.IO/WebSocket.
- Developed authentication, role-based access, Redis caching, and background processing.
- Implemented mentor–mentee matching functionality.

Technical Skills

Development: JavaScript, TypeScript, Node.js, Express.js, Nest.js, React, Next.js, Redux, Prisma, Mongoose, REST APIs, Microservices, Socket.IO, WebSocket, lua.

Data & Infrastructure: PostgreSQL, MongoDB, Redis, RabbitMQ, BullMQ, AWS, Docker, Linux, CI/CD, Nginx

Integrations & AI: Stripe, SSLCommerz, Payment Gateways, Webhooks, Third-Party APIs, Agentic AI, AI-Assisted Development.

Tools & Environment: Git, GitHub, Postman, Bash, Zsh, Neovim, Tmux, Hyprland, Kanata keyboard

Production Applications: Developed and maintained backend services for multiple publicly released mobile applications, including [Allô Taf](#), [Bridge System](#), [FreemanZ](#) etc. (Google Play Store & Apple App Store), contributing to APIs, authentication, database operations, business logic, integrations, and production maintenance.

Certifications & Training

Full Stack MERN Development— Programming Hero

Practical training in full-stack web development, REST APIs, authentication, database design, frontend development, and deployment.

Languages: Bengali: Native · English: Fluent

Engineering Interests: CLI-driven Linux enthusiast with a keyboard-first development workflow, using Bash, Zsh, Neovim, Tmux, Hyprland, and custom automation.

Current Focus: Deepening expertise in scalable backend architecture, distributed systems, cloud infrastructure, and AI-assisted software engineering.
